

About us

We are a rapidly growing team of energy experts looking for bright and ambitious young people with strong interest in renewables. We are seeking an Asset Manager willing to support global investors and some of the largest Polish companies in growing and managing their renewable energy portfolios in Poland. We are a member of Solar Power Europe, one of the biggest independent solar organisations in the world.

Your role

You will be a member of our asset management team with main responsibilities around protecting and creating value for the solar farms we manage for our clients. You will cooperate with Eryg management and have the opportunity to practice your team management skills as well as working with financial, legal and technical teams. You will have a real impact on the managed assets value, our company's processes (optimising and automating existing ones and creating new ones), tools and team shape/structure. According to your interests, you will be encouraged to participate in M&A and other projects to better understand solar investors perspective and expectations.

Main responsibilities

General

- ✓ Oversight of selected solar farms
- ✓ Direct cooperation with Eryg management on value creation initiatives relating to both solar farm performance and internal asset management processes
- ✓ Direct cooperation with investors and Eryg financial, legal, technical and business development teams

Business analysis and reporting

- ✓ Regular analysis of sites performance, including energy production, revenues and costs
- ✓ Preparation and review of regular management reports to investors
- ✓ Drafting budgets and comparing actual results against budget
- ✓ Business efficiency improvements and implementation of value creation initiatives

Contract management

- ✓ Support in running tenders for selling energy and purchasing services
- ✓ Manage obligations and compliance requirements for contracts with energy off-takers and service suppliers
- ✓ Manage landowners' database and liaise with landowners
- ✓ Control energy invoicing
- ✓ Review invoices issued by suppliers

Compliance

- ✓ Support in managing relations with regulatory and governmental bodies, as well as OSD
- ✓ Support in managing environmental reporting and compliance with environmental decisions

Requirements

- ✓ Higher education, Engineering preferred but not a must
- ✓ 1-3 years in a team managing solar or wind assets in Poland
- ✓ Languages: Polish and English

Our offer

- ✓ Competitive compensation package and flexibility in terms of contract type
- ✓ Cooperation with the biggest investors in the renewable market in Poland
- ✓ Company culture focused on employees' growth, their needs and creating value to clients
- ✓ External trainings for both soft and technical skills
- ✓ Partial remote work possibility
